

Verdant Energy Management Solutions

Plug & Play Smart Thermostats.

Optimal Energy Savings

Our proven approach to energy management generates measurable savings like no other thermostat can.

Premium Comfort

Achieve your energy saving goals without compromising on comfort with Verdant's wired & wireless thermostats.

12-18 Month* Payback Period

Verdant's plug & play smart thermostats can be self-installed and generate a quick return on your investment.

Energy Efficiency meets Innovation

Verdant's proprietary communication protocol leverages low frequency radio waves that easily penetrate thick walls and cover long distances, eliminating the need for additional networking equipment and keeping your Wi-Fi network free of any interference.

Installed in over
7,000 Properties
in North America

Self-install in less than
10 Minutes
per unit

We believe energy efficiency comes with innovation. Verdant's patented features, like night occupancy mode and dynamic recovery combined with motion and body heat detection, make Verdant the smartest, most efficient solution to manage HVAC energy while maintaining preferred temperature. Our commitment to cutting-edge technology also extends to smart integrations like door locks and lighting—proving innovation can be both effective and efficient.

*The average payback period for Verdant systems in the hospitality industry typically ranges from 12 to 18 months. However, actual results may vary depending on factors such as property type, climate conditions, management practices, and other variables.
