

Verdant Energy Management Solutions

Plug & Play Smart Thermostats

Energy Efficiency Meets Innovation

On average, **hotel rooms are unoccupied more than 60% of the time**, even when rented, wasting energy heating and cooling empty rooms, and unnecessarily inflating your electricity costs.

That's where we come in. Our smart thermostats solve this problem by using **advanced occupancy sensing technology** to continuously scan the room for motion and body heat. When guests are present, they're given full control over room temperature.

When guests leave the room, Verdant thermostats enter 'setback mode', allowing room temperatures to drift naturally by a few degrees, **reducing HVAC runtime by 45% on average**.

REAL Energy Savings

Our proven approach to energy management generates measurable savings like no other thermostat can.

Premium Guest Comfort

Achieve your energy saving goals without compromising on guest comfort with Verdant's wired & wireless thermostats.

12-18 Month* Payback Period

Verdant's plug & play smart thermostats can be self-installed and generate a quick return on your investment.

Installed In Over 11,000 Properties Worldwide

Self-Install In About 10 Minutes Per Room

*The average payback period for Verdant systems in the hospitality industry typically ranges from 12 to 18 months. However, actual results may vary depending on factors such as property type, climate conditions, management practices, and other variables.

Our Hardware

Verdant VX4 Series Thermostat

Our flagship thermostat, the Verdant VX4 offers a new sleek and simple look with fingerprint-resistant glass surface and Verdant's reliable and robust industry-leading technology.

A smart thermostat to help your property achieve smarter energy savings with Verdant's patented energy features.

Our Software

Our Web-based Platform

Remotely manage all your properties from one platform, anytime, anywhere.

A web-based platform to maximize your property's energy savings by monitoring and optimizing energy management while providing you with measurable energy reduction data and insights for all your properties.

Our Energy Optimization Service

Level up your energy savings with Verdant Plus.

Verdant Plus provides the right toolkit to maximize your energy management system's performance while reducing on-site staff responsibilities. Consider it an extra set of eyes on your energy savings.

Receive custom escalation emails concerning energy disparities impacting the property. This helps you, as a property decision-maker, stay informed & updated on your property operations & savings.
